EDUCATION

University of Georgia

Bachelor of Science in Computer Science

Awards: HOPE Scholarship, President's List, Dean's List

Expected May 2027

GPA: 3.54 / 4.00

SKILLS

Languages / Frameworks: Java | Python | TypeScript | SQL | JavaScript | React | Spring Boot | Node.js

Relevant Coursework: Data Structures & Algorithms | Database Systems | Software Engineering

Tools: MongoDB | MySQL | Drizzle ORM | GitHub | Expo | Tailscale | Ollama | REST APIs | Gemini API

PROJECTS

Apothokeep (UGA Hacks 11) | *React Native, Node.js, TypeScript, MongoDB, Gemini API, Expo* Feb 2026

- Built a full-stack application to predict the expiration for **10K+ products** using USDA datasets and Gemini API
- Implemented barcode scanning pipeline and API integration, reducing manual input time by **~80%**
- Achieved a **95%** prediction accuracy through tuning and dataset validation

Local AI Personality & Music Streaming Platform | *React, MongoDB, Springboot, Tailscale, Ollama* Nov 2025

- Developed a full-stack streaming application with a React frontend, Spring Boot backend, and local Ollama models for conversational song recommendations and playlist generation
- Designed backend APIs for music playback, chat history, and AI driver workflows
- Enabled secure cross-device access by exposing the local backend through Tailscale, allowing authorized users to stream music and interact with the AI across networks

K-12 Solar System Conversational AI (ColorStack Hackathon) | *Express.js, Gemini API* May 2023

- Built a multi-turn conversational AI tutor using Express.js and Gemini API to answer Solar System questions with context-aware responses
- Implemented session-based state management and prompt design to maintain conversation flow and generate age-appropriate, scientifically accurate explanations
- Tested the application across **20+** user conversations to validate usability for K-12 learning scenarios

DevDogs Community Resource Forum | *React, Tailwind CSS, MySQL, Next.js, Drizzle ORM, Figma* Sept 2025

- Increased major-related activity participation by **35%** over 5 months by developing a resource forum with an embedded event calendar and search functionality, serving **100+ CS students**
- Contributed to production deployment serving **200+ active** users by participating in an agile-based development that included weekly stand-ups and code reviews, using Git and GitHub for version control and collaboration

Internship Weather Finder App | *Java, JavaFX* Dec 2025

- Developed a JavaFX desktop application integrating internship and weather APIs for location-based job searches
- Implemented keyword filtering and geolocation-based recommendations, reducing user search time by **~80%**
- Designed API request handling for real-time data retrieval and filtering

PROFESSIONAL EXPERIENCE

Computer Science Tutor, Private Tutor | Lawrenceville, GA Aug 2022 - May 2024

- Taught Java and OOP concepts to **10 students** through code walkthroughs and debugging sessions
- Designed custom practice problems to reinforce algorithms and system design fundamentals
- Improved student test scores by **60%** and increased project completion rates

LEADERSHIP & INVOLVEMENT

Kappa Theta Pi, Member | Athens, GA Jan 2026 - Present

- Participated in technical workshops and professional development events focused on development and leadership
- Led peer technical sessions, helping members improve coding proficiency and tech literacy
- Assisted **20+** members in strengthening skills across programming and accessing technical resources

ColorStack, Member | Atlanta, GA Aug 2023 - Present

- Engaged in mentorship programs focused on interview preparation and software engineering
- Connected with **30+** members through networking events and community discussions
