## EDUCATION

---

### University of Georgia

*Bachelor of Science in Computer Science (Candidate)*

*Expected May 2027*

- **GPA:** 3.54 / 4.00 | HOPE Scholarship, President's List, Dean's List
- **Technical Skills:** Java | Python | TypeScript | SQL | JavaScript | React | Claude | Node.js | REST APIs
- **Relevant Coursework:** Data Structures & Algorithms, Database Systems, Software Engineering

## PROJECTS

---

### Apothokeep (UGA Hacks 11) | *React Native, Node.js, TypeScript, MongoDB, Google Gemini, Expo*

- Achieved 95% accuracy in predicting expiration dates for 10,000+ perishable products by developing a full-stack mobile application integrating barcode scanning with USDA Food Safety databases, leveraging Gemini to give users accurate expiration dates

### Local AI Personality & Music Streaming Platform | *React, MongoDB, Springboot, Figma, Tailscale, Ollama*

- Developed full-stack streaming application with integrated AI personality using local Ollama models, Spring Boot backend, and React frontend, enabling conversational music recommendations and playlist generation
- Enabled secure, cross-device access by exposing the local backend and database over a private Tailscale VPN, allowing playback and AI interaction from any authorized device on any network

### K-12 Solar System Conversational AI (ColorStack Hackathon) | *Express.js, Google Gemini*

- Built a multi-turn conversational AI tutor with session-based state management, enabling contextually aware dialogue about the Solar System to increase retention in K-12 STEM education.
- Leveraged Google Gemini's API to generate contextually appropriate educational content, implementing custom prompts to ensure age-appropriate language and scientifically accurate information

### DevDogs Community Resource Forum | *React, Tailwind CSS, MySQL, Next.js, Drizzle ORM, Figma*

- Increased major-related activity participation by 35% over x months by developing resource forum with embedded event calendar and search functionality, serving 100+ CS students
- Contributed to production deployment serving 200+ active users by participating in an agile-based development that included weekly stand-ups and code reviews, using Git and GitHub for version control and collaboration

### Internship Weather Finder App | *Java, JavaFX*

- Streamlined internship research workflow by developing a JavaFX application that integrated internship and weather APIs with keyword-based searches and location-specific filtering

## PROFESSIONAL EXPERIENCE

---

### Computer Science Tutor, Private Tutor | Lawrenceville, GA

*August 2022 - May 2024*

- Improved Java programming comprehension for 25 students through personalized tutoring sessions and code walkthroughs, achieving 60% increase in test scores and enhanced project completion rates

## LEADERSHIP & INVOLVEMENT

---

### Kappa Theta Pi, Member | Athens, GA

*January 2026- Present*

- Participated in leadership events and social events that included other computer science members, that aimed at increasing overall professionalism and technical skills utilizing technical workshops and alumni events to gain real world insight.

### ColorStack, Member | Atlanta, GA

*August 2023 - Present*

- Active member in a nationwide community of Black and Latinx CS students who engage in mentorship programs, tech talks, and networking while leveraging internship resources

### DevDogs, Student Representative | Athens, GA

*September 2025 - Present*

- Collaborated on campus-wide projects to improve student experiences while networking with peers to prepare for internships and career opportunities

### Association for Computing Machinery, Member | Athens, GA

*January 2026 - Present*

- Contributed to the planning and execution of ACM community and technical events, supporting initiatives that increased student engagement in computing.
